IT'S A LONG WAYS DOWN from the Gator Bowl's press box roof. Here the Nodars (Jax) Antenna team precariously race against time and an impending summer storm. W4TZ/4 - Fla Field Day defending champs - made 2,333 QSO's with three transmitters for a point-score of 20,086.

-K4DSN

Ham helps boy get critical operation

Josef Darmento, W4SXX, has won the recognition of his community and the plaudits of the ham radio fraternity for his assistance in helping a small Italian child receive a crucial heart operation. His able use of ham radio paved the way for 4 year-old Fabio Piamplani to undergo a heart operation last month by Houston's famed Dr. Michael DeBakey.

On June 9 Joe intercepted an urgent plea on twenty meters from IIBAX, Roger, a doctor in the Adriatic Sea fishing village of Civitanove. Roger outlined to Joe that the child had a hypertrophied right ventricle and would die if he didn't get an operation within three months. Responding W4SXX, then contacted his wife visiting in Austin, Tex., who in turn talked with Dr. DeBakey in Houston. The famous pioneer of heart transplant surgery gave his tentative approval for an operation at no charge, if the child could be brought to Houston.

Darmento, a Merritt Island resident and a physicist with the Air Force Eastern Test Range, relayed this information back to Italy and arrangements were made for the boy's trip to the United States. Concerned Italians donated between \$4,000 and \$6,000 so the boy could receive another chance at life. Finally during early July little Fabio Piamplani made the trip from Rome to New York and on to Houston. W4SXX enlisted the aid of three New York hams K2JSO, W2IOM, and WB2CBP to assist the boy's mother in finding the right plans from JFK Airport to Houston.

Sorrowfully the child died on the operating table July 12. But at least the boy had a chance at life he wouldn't have had if it

weren't for ham radio.

In an editorial entitled HUMANITARIAN HAM, the newspaper Coccia Today said, "We think this is a fine example of man's humanity to man."

For his pivotal role in this outstanding example of the good in our hobby, FLORIDA SKIP this month salutes Josef Darmento, W4SXX, as "Ham of the Month". WA4ABY

LADIES OF 1970

We thought you might like to know the names of our Miss Hurricanes for 1970. (Hurricane season, June 1 through November 30, 1970). Hold onto your beams.

ALMA, BECKY, CELIA, DOROTHY, ELLA, FELICE, GRETA, HALLIE, ISABEL, JUDITH, KENDRA, LOIS, MARSHA, NOREEN, ORPHA, PATTY, RENO, SHERRY, THORA, VICKY and WILMA.

Wind classifications: Tropical storm from wind speeds of 39 to 73 mph. Hurricane winds speeds from 74 mph or more.

SILENT KEYS

Letters To Editor

Editor:

Thanks for the June issue. On page 11, I see a Paragon RA-10 receiver and a DA-2 detector and two stage amplifier which was designed by Paul Godley and manufactured by the Upper Montclair, New Jersey. I had the same combination myself in the early 20's when I lived in North New Jersey. I used to hear the 6th District come thru on 200 meters.

What really gets me down, is the lack of 2 meter AM operation in Florida. I started on that band in 1947 and up north a contact is possible at most times, day or night. Down here everything seems to be 2 meter FM with relay stations — and not much of that. According to the book, FM is like a one hundred watt transmitter modulated 25 percent AM that is.
73 Albert C. Dick, W4CKE
21 Florida St.
Zephyrhills, FL 33569

Editor:

I have enjoyed reading SKIP for years. I bring one up to current events and things to come also I do have insurance on all my equipment which I think is necessary. I lost my tower, Ham rotor and 2 element quad during Betty a year ago. So, I know how it feels to lose any outside equipment. The insurance company paid 90 percent, but I had to change to another insurance company. I now have an E-2 Way crank up, tilt over tower, which I like very much.

Am now going sideband and selling my AM year. (See Hamber section).

Editor:

Just received in today's mail my certificate as the California winner in the 1970 Florida QSO Party, and I'd like to express my thanks and appreciation for it. It's quite attractive and someone did a nice job of filling it out.

Thanks also for the sample copy of FLORIDA SKIP, which arrived recently. I guess I'll pass up becoming a member, but I will say that I wish we had a publication that good in California. If there is one, I'm not aware of it.

Thanks again and 73,
A. E. Olson W6QFU
Santa Ana Calif. 92705.

Editor:

Just read August SKIP and noted Sheriff Starr award to W4RGO. Am enclosing a copy of an award I received for assisting Sheriff's Boys Ranch and thought you might make mention of it. If any amateur wishes to donate any equipment, in the Miami area, to Sheriff's Boys Ranch, they can call me and I will see it's delivered to the Ranch.

FLORIDA PUBLIC SERVICE CORPS

Ken W4SMK

The results of the 1970 Simulated Emergency Test are in August QST, and once again E. Fla. is number two, ranking behind Ohio. Our thanks to all of you EC's and amateurs who helped make this possible, and shame on those of you who did not participate. It might be argued that a test emergency does not prove much, since many people who will not take part in a test will participate when the real thing comes along. For instance W. Fla. ranked 42nd in the SET (out of 58 sections) but when the real emergencies come along the W. Fla. boys always seem to give a good account of themselves.

However, the question is just how good a job might we expect from people who never practice compared to those who do practice, or who at least participate in regular traffic nets in order to know what it is all about. When a hurricane pops up next time please notice the strange calls you hear on the nets who are all eager and willing to help. Some of these calls are experienced operators using club calls or stations licensed to CD, etc., but many of them are refugees from somewhere who merely succeed in muddying the water and driving the net controls crazy. They mean well surely, but then so did the people up in Salem who burned the witches years ago. Meaning well is not enough unless you know a little bit about what you are doing.

The best advice we can give folks like this, who dust the cobwebs off their gear just for hurricanes, is please do some listening before you jump in with both feet. At least follow the advice of the net controls, your local EC, CD director, or whoever is in charge of the operations in progress. If you want to debate some phase of the operation make a note and do it after the emergency, not over the air while business is hot and heavy. Better still how about joining in with your local AREC group, or CD communications before the next big emergency?

Deadline — 10th of month in Box 501,
Miami Springs, Fla. 33166.

Any item in FLORIDA SKIP may be reprinted in any other amateur radio publication in the world with a credit line EXCEPT CARTOONS by W4GAT. Written permission from the editor must be obtained before reprinting the cartoons.

AMATEURS AT SWIM MEET

The Miami Springs Amateur Radio Club assisted with a community effort to provide communications to South and Central America. Using K4OSQ five members of the Springs group set up a station at the Miami Springs International Swim Meet; a three-day event held at the Springs Recreation Center. The goal of the K4OSQ group was to provide results and phone patches to those international swimming teams participating in the competition. Using a Swan 500CX and a Moely TA-32 beam, the good word about the International Swim Meet was spread to Puerto Rico, Jamaica, Trinidad, Mexico, Guatemala, and El Salvador. The station set up pool-side at the meet, attracted a great

many curious spectators some viewing our hobby for the first time.

During the meet held August 6 through 8, the Miami Springs ARC handled about thirty formal QTC and uncouned phone patches.

NEW AUCTIONFEST DEBUTS

Come early and bring a friend is the motto of the first annual Miami Auctionfest, sponsored by the Dade County Amateur Radio Public Service Corps. The fledgling event neatly fills in the gap for those hams with a room full of gear gathering dust until the next So. Florida Hamfest in January. The date to remember is Sept. 19. The place to be at 8:30 a.m., that fine Saturday is Monsignor Pace High School, 15600 N.W. 32nd Ave., just north of Opa-Locks.

This auctionfest is patterned after the other auctionfest in March, with one notable exception. To meet expenses the DCARPS will charge a 6 per cent commission on all goods sold, whether by bid or direct sale. This fee is half of what that OTHER auctionfest charges. Admission will be \$1.00.

PLAYGROUND A.R.C.

By Bill Schuch
W5CMN WB4NH1

Sunco has played havoc with club activities but we are still in there pitching. We still welcome visitors from out of town. Club info can be had at B & C Electronics on Race Track Road, Ft. Walton Beach. High light of recent club activities was a presentation of an award to K5UBB, Jerry Greene, you have to see it to believe it.

Fall activities are being planned. Dinner meeting, possible contests for members and possibly a speaker from A.R.R.L. The later is still in planning stage. Publicity will be plenty in advance so all can be there.

The emergency bus is now running, painted and ready for the interior furnishings, such as rigs etc. As usual a LOT of help is needed, but, it will be done.

Come and see us, y'all people.

suspended until September.

"LJ" WA4SCH has been under the
weather and at this time we have not heard
the results of the many X-rays his doctor
ordered, but we know they will all show
nothing serious. W4DFZ also had our turn
at being under the weather and was or-
dered to bed for three days. After the three
day rest we went back to the doctor and
although he is sure we had a slight stroke,
did permit me to resume normal activities.

Tad, K4AGU, had a friend from Deltona
stop by, none other than Jack, W4YPA,
and Tad brought him over, but, and so
sorry, we were traveling around Florida,
natching up on some visiting.

As the Treasure Coast chapter of the
QCWA does not have a correspondent yet,
would like to let all members know that
our first meeting will be at the joint
meeting of all chapters to be held at the
Melbourne Hamfest, Sept. 12, 1970. Details
and more information of this event will be
sent to all members. At this time, you may
also be interested to know we now have
seven new members signed up. Most of
these will become members of the Vero
Beach Amateur Radio Club in the very
near future.

WEST PALM BEACH AMATEUR RADIO CLUB, INC.

By Clara Stables, WB4NIR

On Wednesday, September 2, at 7:30
P.M. at 823 Newark Street, West Palm
Beach, classes leading to a Novice License
will start and will continue weekly
thereafter. All interested persons in the
Greater Palm Beach Area are invited to
attend these classes in code practice and
theory.

At the same time, classes for those who

hold Novice and Technician licenses who
wish to upgrade their licenses to General
and Advanced will begin.

Let's start the sizzling 70's off with a
bang with a record enrollment!

In the ARRL Field Day, June 27-28, the
score was as follows: a total of 1,196
contacts; the score before bonus — 1,292
and 200 points for emergency power; and
200 points for message origination; add
200 points for publicity — total score —
1,892.

WESTERN FLORIDA NEWS

By Frank M. Butler, Jr., W4KKH

Pensacola. W4SGTJ is building a
mobile rig. W4DYM and K4VPY are QRL
with school. Tallahassee High School has formed a
radio club, and needs parts and equip-
ment. Write: Jay Reynolds, P.O. Box 68,
Gonzales 32560. W2FEM is a new ham in
town. The W4UC repeater is temporarily
off the air for relocation of the receiver
site. Milton: K4DDV is active on 7m 55B.

Fort Walton: In W4REM, at age 18, the
youngest local ham? W4QYJ, W4RRD
and W4HKT are more graduates of the
Novice Class. WB4NH1 made the Phone
CD Party; he is building a QRP transistor
rig. W4UHI and KYL. W4OGQ have
moved to Chicago. The CD van has finally
been painted, and is being readied for
equipment. The Playground ARC had a
fine program on building codes, insurance
and taxes as related to amateur radio.

Chipley: W4KH, W4ZPK, W4PVG
and W4NPVH took a camping trip all the
way to Fairbanks, Alaska.
Panama City: The PCARC has a new
clubhouse in Millview. Meetings are now
held on Wednesday nights. W4VYI
renewed OVS appointment. Tallahassee:
The TARC had a good crowd at their in-
stallation banquet, including W4GFW
from Newport.

Apalachicola: K4BDY is recovering
from a back operation. W4GOO is mobile
on 2m FM. W4WSY has moved to Mon-
tello.

DADE COUNTY ARPS By John Aikens WB4KQR

Make your plans now to attend the first
annual Miami Antiques on September
15, at Monsignor Pace High School. See the
ad elsewhere in Skip for further in-
formation.

The Corp has really been busy lately.
The Executive Board has rewritten the
constitution, to update our Corp. If you
wish to have a copy of the new constitution,
please send us S.A.B.E. to 1710 N.W. 14
Ave., Miami.

The DCARPS will soon be sponsoring
an Explorer post, for boys and girls, ages
13 to 17, interested in radio com-
munications. The course will concentrate
on amateur radio, and will include field
trips. All interested in joining the program
should write to our President Dennis
Dean, WB4LBH, at 190 N.W. 183 St.,
Miami.

The Novice course, held at J.F.K. Jr.
High, proved to be very successful. We had
four of the students pass the code test.
They anxiously await their written tests.
Congratulations to our new members.
Ralph W4QLM, and Larry W4QLH
recently joined the Corp.

You are also cordially invited to join our
group. Our Corp meets each second and
fourth Thursday of each month, at Mon-

signor Pace, at 1505 N.W. 32 Avenue,
Miami.

KNIGHTS OF KILOCYCLE W4NGR — Master Oscillator

Well it looks like our little article "CO
Knights of Kilocycle" brought out some
"Knights" that had been staying away for
some reason or another. We welcome Bill,
W4BCZ and Sam, W4LIS for showing up.
Nice to have W4BIL, Fran and her OM
W4WME, Bill call in, also. Good to hear
Chiff, W4HZ from Jacksonville. Lou,
W4VPQ will be missed by the Knights. His
sudden death was a shock to many of us.
The flower fund has taken a nice upswing
and we thank all Knights for their
generous donations. Guess we'll have to go
back to giving license renewal dates along
with the birthdays and anniversaries.
Seems like one of our old timers let their
license expire and now along with a cost
increase they will have to take an
examination from "Uncle" Frank Charlie
Charlie. Right now when does your license
expire?? See you Sunday morning on 3810
Kc at 7:30 EDT. 73.

JACKSONVILLE, FLA.

Masters, at Lake Placid

KP4CL Alicia, Honorary Member, has 218 Countries worked on 10 meters SSB. Her youngest son will enter the University of Va. in Sept. to study engineering.

W4WPD Shirley Bill surprised OM, W4LFR Earl when a Heathkit Organ was delivered. Now they have a project for all their spare 121 time.

The PCARS (Platinum Coast Amateur Radio Society) will hold their 6th Annual Hamfest, Sept. 12th, 9 A.M. to 5 P.M., in the Melbourne Civic Auditorium. See you there!

BOARS

By WA1ABY

The above title is not editorial comment about most hams, but is an acronym (or a new organization in the Sunshine State. It stands for the Betterment of Amateur Radio Society. This group of concerned amateurs meets weekly on forty meters to hash out and attempt to solve some of the many problems our public service hobby faces. We are primarily an internal organization, not concerned so much with public service for non-amateurs but for the upgrading of our hobby in the eyes of ourselves as well as the public we serve.

The BOARS constitution states "We the undersigned, conscious of our responsibilities to our fellow man, eager to coordinate our individual efforts to help those in need, and hopeful that together we will produce a positive and realistic approach to the problems of our times hereby organize . . . for the purposes of (1) sustaining our radio amateur privileges by participating as well organized group in any matter pertaining to the amateur radio service; and (2) promoting the growth of amateur radio by informing those unaware, instructing and or advising those interested, and assisting those licensed to find the pleasures and responsibilities of being a Ham."

BOARD meets every Sunday at 1800 GMT, 2:00 p.m. EDT on 7365 KGE. President is WB4EEL, Rick, in Tampa.

Among the first activities of the organization is the aircode practice. Dates and time for this needed service are yet to be worked out but it is hoped that by helping novices become generals we will be helping to better amateur radio. Standard practice during our meetings is for one of our members to QSY to the service section of the band and standby for novice QNI. The novices frequently is 7115 and at a specific time weekly, WB4HNL will ask for Novice QNI. The listener is the Novice band will acknowledge QNI there

and reQSY back to forty five and relay those who have joined us.

BOARS is always interested in new members, especially members with unique ideas on how we can serve our hobby. Dues are \$1.00 annually. 7265 kc is the place 1800z Sunday is the time. See you there.

QCWA

SOUTHEASTERN CHAPTER

The Miami QCWA dinner meeting went off on schedule with a record crowd in attendance. The Gold Star goes to Arch, W4FCM, he brought the whole family. Wife W4PDU, son David, W4QWA, daughter Cindy, W4QWF. Another Father and Son, W4JUG, and W4BKK were among the new visitors.

Old Times, W4KO and K4OL (ex 2EE) met, and learned that they were neighbors back in the early days, in Boston, Mass. To top this your writer lived within two blocks of this neighborhood twenty years later.

Antique Meter Night brought a lot of smiles. Of top interest probably was the McIntosh Antenna Amplifier, vintage 1915-1916. An early model McIntosh Millimeter, looking like a barometer was seen, Vintage 1904-1910. A watch case voltmeter (1900) and a Weston Anneter 719127 was shown privately. Those disappointed in not seeing the 1873 handbox an motors will have another opportunity at our next meeting, September 3rd.

We thank W4YPA, of the Citrus Chapter, for his fine job of organizing the State Wide QCWA NET on 7254 every Sunday at NOON to one AM (or later). So far — W4JHW, W4GJ, W4R2G, and W4JO are representing the Miami Chapter. Let's get more in there from Miami to join this fine state wide group.

Don't forget, Sept 3 is "WD-11 NIGHT" at Smitties Coffee Shop, 3300 N.W. Second Avenue, Miami. No old times would ask what a WD-11 is, but in case you forgot, how about meeting the gang and refresh your memory.

73, WAJO, Sec-Tress.

B.A.R.C.

By Jim Wilson W4GDK

Those who wanted to learn more about SSB were given a treat at the August B.A.R.C. meeting. The ARRL movie on SSB gave all of us a better understanding of this mode which does so much to narrow down our signals. We were glad to have so many visitors, all of whom were introduced.

Because of a conflict at our July meeting

place, we moved back to Broward Court House and the August meeting was also held there.

Rob Lloyd, Field Day Chairman reports that the set-up in Birch State Park near the Ocean with its 5 kw bulky generator had a lot of activity during Field Day. Ten operators made a total of 796 contacts on 20, 15, 10 and 6 meters. The generator said "No" about 20 times, but after feeding it some spare parts it started to sing. Two hand openings on 6 meters gave 326 contacts there alone, though improper logging wiped out many contacts. Bob thanks all for their help and looks forward to a bigger and better score next year.

Get ready gang! At the November meeting we will have "Honey Brew Night." Here we will get to see the "Brain Children" of our members. Bring any piece of gear you designed or built, except from kits. Awards will be given in several categories. Last year we had some very clever pieces.

We urge you all to get ready for hurricanes. If possible get emergency power and a spare antenna which can be lashed up. Know how to contact Civil Defense. This will be discussed.

The September meeting on Sept 9 will be held at Broward Court House, 301 S.E. 6th St., Ft. Lauderdale at 7:30 PM. Ask the guard for the room number. We're anxious to meet anyone interested in amateur radio. Come and share our interest. If you have questions, phone to our President Ruth Christian W4HED, 523-1517, or our Secy. Hal Wormser W4HSH 584-7068. Come and bring a friend.

DELTONA NEWS

By Jack Six W4YPA

Deltona CD net met every Friday during Aug. 7:30PM on 28.605 KHz. A few members were missed due to vacationing. Looking for their return. K4LV Tom took off July 8th for an extended trip to Nassau.

Smile signals received that WB4QPI, Clarence Wandry, is building a house in Deltona. Understand he is retired from Zenith Corp.

The first Florida State wide QCWA net was started July 12th by yours truly with 19 check-ins and a good many have checked in each week ever since. This net meets every Sunday 12 noon on 7254 KHz. All QCWA members are welcome. Florida Skip now has it listed under "nets."

Had QSO with Cass W4NCR and his XYL Caddy W4ASL while camping at Broken Arrow Camp near Deltona.

Dec. W4BZK has a new High-Gain roller handling his 40 meter beam! K4MY Ralph has a new SB220 on air now sounds

great. Yours truly and XYL enjoyed wedding anniversary trip to Key West and during my absence K4H took over NCS of Deltona CD net and W4PI handled the QCWA Florida State wide net for me. Both did a commendable job. Many thanks fellows, for your help.

That's all from Deltona but as usual remember it's great to be alive. Enjoy everyday and spread words of cheer to all you meet and the waves of happiness will roll in.

FORT PIERCE RADIO CLUB INC.

By Bill Craker W4BHIQ

The Fort Pierce Radio Club Inc. for the first time in some time entered Field Day. We had lots of fun. Gig, W4N0Z cooked steaks for all the operators. It was worth fighting the QRM to taste those juicy steaks. We were running a Swan Cygnat 360 with a vertical. Nothing fancy, but it did work. The maspower that we had behind the rig were the following: W4MEJ, W4N0Z, W4M0U, W4BPWE, W4BHIQ, W4BNEY, KP4CBI W4BDDO, W4BMEK, W44ESG, W4NTE, and W4VPQ.

The newly installed officers of the club for this year (July-June) are W4N0Z, President; W4MEJ, Vice-president; W4BHIQ, Secretary; W4LME, Treasurer; W4VPQ, Trustee. The new EC that was approved is Jake, W4NTE. Jake and several other members are working with the Civil Defense Director to coordinate an excellent emergency communication network for our city. Jake is really getting things moving.

Several of our members finally got the incentive (not the one created by incentive licensing but the one created by the license fee increase to \$9.00) and made an attempt at upgrading their licenses. Those trying were W4BPWE and W4BHIQ for Advanced, and W4MEJ going for General. All looks favorable.

It is with great sadness that I bring to mind the passing away of Past President, Trustee Louis Bergeron, W4VPQ. Lou, who had recently made QCWA, put more into the club than any other one individual. We will always be in need of his expert advice, technical knowledge, and his unselfish support and aid which he was always willing to extend.

We are still meeting at the Fort Pierce Power Plant each Monday with code 7-4 and from 8-9 PM the first and third Mondays.

SOLID STATUS

By Dick Blasco WA4DHU 2

PART 4 — More Biasing

Part 3 represented two basic biasing arrangements; and indicated some of the things to look for in transistor biasing. This article presents a very practical and widely-used biasing circuit — the stabilized bias circuit.

You might recall from Part 1 that transistor currents are extremely sensitive to changes in base-to-emitter voltage. For silicon, for example, a V_{be} of 0.4 volts will cause a transistor to be cut off, while a V_{be} of 0.7 volts will cause it to be saturated. Thus, a swing of only 0.3 volts can cause the device to change from cutoff to saturation. This important property is used in the stabilized bias circuit to give excellent control of transistor currents.

It is obvious that if the emitter were held at constant voltage and the base voltage increased very slightly, the transistor currents would increase sharply. It is also true, however, that the same thing can be accomplished by decreasing the emitter voltage while holding the base constant. This is what is done in this circuit. Assume that base voltage V_b is held absolutely constant. Any increase in transistor current would cause more current to flow through R_e , increasing emitter voltage V_e . But this has the effect of decreasing V_{be} , since we are holding V_b constant. Current will tend to fall off sharply, and we have the same "negative" feedback effect observed in the collector bias circuit. The big difference here is that V_{be} is being changed instead of base current, and much better control of transistor current is obtained by utilizing the extreme sensitivity of V_{be} .

Of course, getting V_b constant is a bit of a problem. If we hold V_b too constant, we won't be able to put any signal on the base without resorting to expensive chokes. On the other hand, if V_b isn't constant enough, base voltage will always change in such a way as to undo the effects of R_e . A compromise "rule of thumb" is shown in the Figure. Putting voltage a divider between $V_b(+)$ and $V_b(-)$ provides a fairly stiff voltage source, but with ability to handle small signals on the base. By choosing R_1 so that ten times base current flows through it, and R_2 so that nine times base current flows through it, a good compromise is obtained. Choosing V_e to be 1 to 3 volts under normal currents determines the value of R_e .

$V_b(+)$ and $V_b(-)$ are flexible. For example, tying $V_b(+)$ to V_c and $V_b(-)$ to ground will allow operation from a single power supply or battery. This is indeed the most common arrangement.

This circuit can be applied using Ohm's Law as before, and some examples and comments will be presented in Part 5.

ORLANDO RAMBLINGS

Hal, WBKC

Amateur Radio News Service awarded a Certificate to Florida Skip for First Place in Local News Reporting.

Andy and Frank, W4JO and the rest of the crew sent it and a very nice letter to Hal, WBKC advising that they felt the

award should go to him, as he had been a Correspondent since the beginning of Florida Skip 13 years ago. My Stacore thanks to all you nice people.

Received several cards from Russ, K4VEJ and Elsie. One of the places they visited was ARRL headquarters.

The nomads, Claudine, WA4SH and Case, W4NGR knew that daughter Bar-

bara was about to become the mother of twins. Case had made arrangements to meet EV, K4UIZ on the FPN for the latest news but over slept and was aroused by the Forest Ranger telling him Barbara had her twins.

Fortunately EV had left the rig on and when Case called she answered and secured the data. One of each a Boy and a Girl. Which keeps the population explosion even anyway. Congrats to Grams and Grandma and the lucky parents of the twins, Jason and Rhonda.

F.S.B.A.

Friends, Fellow Amateurs, and countrymen, lend me your ears. To paraphrase a rather ancient Hellraiser's advertisement: Is the communications art lies the

greatest hope for eventual peace on earth and good will to all men.

Wonder what the effect of the new nine dollar fees will be on amateur radio as a whole. . . the dit dah boys practically checked the growth of the amateur group last year.

Vincent Bailey, WA4QNB, furnished your columnist with copies of minutes of meetings of the last month, and statistically at least our organization is growing. Meeting 538, August second, places the Florida Sidebenders well in the forefront for continuous existence among amateur groups in the United States, with more than ten years continuous service for Amateur Radio. It takes amateurs like WA4RGO, W4SK1, WA4RA, W4GLO, W4JQ, K4C, W4DGX and the rest of us both old and new, and a lot of devoted effort to make possible the services performed by the group.

In any organization the individual is more important than the organization because without the individual, you and you and you, the organization ceases to exist.

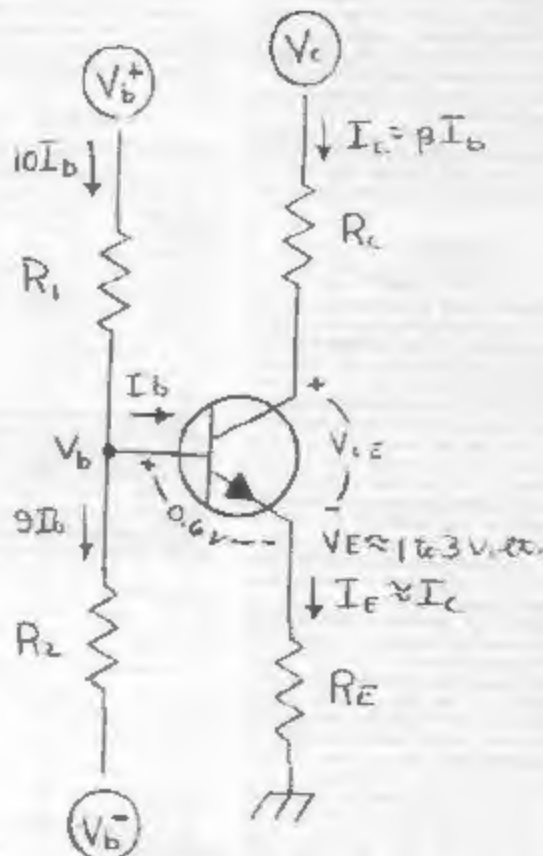

23.
KASRI

NARHUC NEWS

Bill Sutton WA4GFT

Navy Amateur Radio Hurricane Corps. We are the new ham club in Key West. Our membership is small, but growing. We presently have about twelve (12) members and we are expecting many more.

Congratulations to the following members who were elected to office at our last meeting: WB4QKR, President; WB4KFD, Vice President; WB4NVE, Secretary-Treasurer. Our congratulations also to Lee Phillips, WB4LOM, our past

STABILIZED-BIAS

MOVED

TO LARGER FACILITIES

AFTER JUNE 15th WE WILL BE LOCATED AT

HIALEAH, FLORIDA 33012

Our New Phone No. 305 - 821-5802

PLEASE CHANGE YOUR RECORDS ACCORDINGLY

H S ELECTRONICS, INC.

(THE HAM SHACK)

President for a job well done.

We are planning an auction 12 September 1970 at 212 Stadium Trailer Park at 8:00 P.M. The items up for auction will be spare electronic parts.

Our NARIUC NET is on the air Saturday at 1400 EDT or 1800 GMT on 14.303 Mhz. All hams are invited to check in with WB4CUD, Mike Graham, NCS.

We enjoyed recently a visit by Andy Clark, W4IYT, SEC for Eastern Florida. We discussed Emergency Planning for the Key West area.

COUNTRY COUSINS

By Stan Offenbatter, K4GLM

We are pleased with our four new members by their interest activities, that have been shown during this past month. A very special welcome to our new Cousins, W4BCZ, Phil—W4ADCK, Walt—W4VLU, Elaine—W4IAZ, Don—it's a pleasure to have you with us.

WB4EZF, Bob, is at home convalescing from his operation, (it did not take Bob long to get back on the air again, he hopes to be at the salt mine in a month. Mildred Barnes, KY1, of W4YVB, Roy, in responding to the new wonder drug, keep up the fine progress. Mildred

W4BCZ, Phil, has his SBE-33 working. A o.k. now, it certainly sounds good also that pipe around the eaves of the house is working out!

WB4LSI, Don, assistant Chaplain, is back on the air from Milton, after a silence of about six weeks.

WB4CBP, Ted's Jr. Op. Brian is o.k. having been a passenger in a car accident. W4BAV, Cathy and the O.M. W4GHR, Bill are still on vacation, also Edna and Walt, W4PWB, who check in from

Franklin, N.C. W4VPL, Ray and KY1, Glendel started on theirs — y'all have a good time.

A welcome to all to join us every night at 10 p.m. EDT, on 3870 KHz an f.b. certificate is given by the Net — please check in for all particulars.

TAMPA AMATEUR RADIO CLUB NEWS

By Frank Shannon, K4GT

Ray Murphy, W4BNE, county EC, arranged for representation from TARC, Hillsboro Amateur Radio Society, Brandon Amateur Radio Society and other Greater Tampa Bay Area radio communication organizations, to attend an outdoor "Newspaper and Radio Publicity Affair" with Hillsboro County Sheriff Beard and his deputies, and handicapped employees of Good Will Industries. The objective of this gathering was to request

the assistance of all amateurs CB'ers and MARS members to report all suspicious persons seen tampering or looting the outdoor Good Will Industries stands and pick-up boxes. It appears that thieves are now looting and vandalizing these boxes. The Sheriff has requested all reports from amateur and CB'ers (also MARS) to be phoned direct to his office. Ralph Condy, W4BNI, represented USAF MARS, and your Scribe represented TARC. Keep your eyes open!

PLAYGROUND A.R.C.

By Jerry Green K4UBR

The last of the Novice Class has been scheduled for testing and a very healthy crop of 9 new Novices will soon be grinning the bands from the woodcocks of W. Fla. WB4KQX and WB4MHG were seen with heads together at the last social making plans for a new summer class to be starting in July. More Novices than you can rattle a key at!

Regular meetings have been moved to the third Thursday of every month and a social activity meeting every first Thursday of the month. The activity night on June 4th was the first planned event and everyone attending had to bring something from the junk box with the idea to bring as much as possible and take home as little as possible. There were some sneaky trips out to the autos during the meeting. Since the new Novice classes will be starting on June 28th, the next activities night will be in conjunction with that event so that the prospective Hams will have an opportunity to meet many of the areas most active club members.

All members are urged to bring a new ham or a guest to the next meeting. Be ready for R A D I O and its many useful, expensive and desirable prizes starting with the activities night, August 6th, Thursday Night, at the club rooms in the Old Police Station at 7:30PM.

A lot of people think hams just fool around with radios.

Suddenly, your fooling around is frequently the only way of transmitting messages of help and hope. Of course, you didn't become a ham just to help out in a disaster. You became a ham because you just wanted to be a ham. But you've made your hobby an invaluable public service. And FPL is grateful. We remember. A lot of people thought Edison was just fooling around with electricity, too.

FLAMINGO NET

The Flamingo Net with headquarters in Miami (29.044) now boasts over 40 members locally, with 1200 international. YV4NP is our latest international member.

Our next hidden transmitter hunt will be Sunday afternoon, August 30. The round-up area will be announced on the net prior to this date. The proposed contest was postponed because a large absence of our most active members. The starting date will be announced later. Prizes and Certificate awards will be presented to the winners of 100 contests with one hundred Flamingo members, throughout the USA and the world, on 10 meters.

We are advised that FACIF has recently won the "RAF-5" award for her Florida county contacts on 10 meters. This certificate is sponsored by Florida Skip.

The Flamingo Net is probably the oldest net in the world now. We have been invited by SSB from time to time and last Friday, New Control had his turn to reverse the tables with a Swan 350, W4GJ, however, promises to continue his broadcast quality Net Controlship on the Flamingo Frequency for the benefit of AM listeners, on 10 meters.

There is a growing demand for more mobile AM equipment suitable for hidden transmitter hunts on 29.044 MC. Likewise good AM home rigs are getting scarce that will operate efficiently on 10 meters. Get in touch with our Secretary, WA4GGJ, or the man that guards our money, W4RWT, or better yet, our Net Control, W4GJ.

TJ, W4JO Activity Mgr.

GATOR NET

By Ev, W4A

Congrats to K4JWM on qualifying for GN certificate. Others are in the running if they continue their excellent attendance records. Ten or more QNTs for three consecutive months does it.

Despite increased QNTs in July, our traffic dropped to the lowest point in many a day. Could this be related to WA4CK's departure? Let's beat the bushes a bit harder. Originations will help.

K4SJI is planning to move to the Cape area. W4IA is moving to Mount Dora and W4EBW will carry on as GN bonche until he gets set up at New QTH.

GN welcomes all new reporters. Others are invited to drop in at 0630 EDT, 7115 kHz. If poor conditions exist on 40, we shift to 3615 kHz about 0635. Come one, come all!

FLORIDA MIDDAY TRAFFIC NET

By Herb, W4LSR

As usual this time of the year, FMTN news is mostly a record of the goings and comings of our members on vacation. Charlie, WA4KB is somewhere in New Jersey and sends pictures of girls in Bikinis to Clyde, Joe, WA4FGH is away somewhere, catching up on his golf. Mac, W4LJK is in North Carolina. Mack, W4DVR and family took their travel trailer to Myrtle Beach for a couple of weeks. And Herb, W4LSR and KYL will soon be off to her old home in Perna for a few weeks.

So much for the goings. Burch, WB4IIV is back and very busy catching up. Henry, EA4OB and Ed, K4EBE W4TJM have returned. Kelley, WA4FJA is home again and has relieved Dick, K4LEO as New

Control. I prefer both of them. Jerry, WB4KGZ and Harry, W4ZIR have both returned.

Ruth, WA4HED has been checking in most every day since she got her antenna repaired. But now Bill, WA4RQT is having antenna trouble on the mobile and we only hear him on the home rig on Fridays. We are thankful for Steve, WA4RUE, who has been taking care of the Palm Beach area. We do miss K4GJ. Someone spilled coffee in his power supply during field day and blew the power transformer. It is in the repair shop being re-wound.

Poor Charlie, never gets to use K4HS while Randy is home on vacation. But WB4MTQ is still doing a good job as NCS. Charlie K4OER is checking in again. We may expect to hear the old trooper Fred, W4JZB from Holley Hill. He bought a house and is moving up there soon.

Ricky, WB4HNL and Buddy, WB4OMG visited Clyde over last weekend. He sure enjoys company.

The Florida Midday Traffic Net held 27 sessions in July. 789 check-ins handled 316 pieces of traffic. Average stations 28.9 and average traffic 11.7.

T2S NET

By Rick WB4JRV

Summer is taking its toll; stations on vacation accounted for lower traffic and check-ins. Hope to see both categories up this month.

July has brought 3 new members: Keith, WB4HSN (NCS); Sandy, WA4ABY 4; and Joe, WB4JSK. Welcome aboard! Gary, WB4IHI is back on the active list after many busy Sundays. We're now capable of phone patches for Hollywood — Ft. Laud.

A few members will be college bound come fall. Hope to hear you from school stations.

TROPICAL PHONE NET

Ken W4SMK

The following stations are either newcomers to the TPTN, or are old timers who are back on the roll call: WA4BWE, Tom in Indian River City, WB4FGW, Randy at Sarasota, WA4GZV, another Randy at Ormond Beach who will soon leave for the service. Welcome to all and we hope you tell your friends about the Tropical Net.

WB4FGW and WB4JSK have jumped right in and are helping us as net controls. Randy and Joe are both doing a good job, in spite of the Summer propagation. Now is a good time to try your hand at NCS if you so desire, since the traffic load is light, so let WB4HNL know if you want to be a big wheel.

We were all saddened by the death of net member K4BAK, Lou in Palm Bay. He passed away quite suddenly having been on the net a day or so before.

W4NGR surely gets around on his camping expeditions. He checks in from a different campground nearly every week, and says he had a fine time one week at the Fla Sheriff's Boys Ranch.

Hurricane Celia caused a stir in the traffic business, with many stations having Red Cross traffic for Texas, but not many outlets available. Liaison with the NTS from our net was not particularly good, since many stations were advised to take their traffic to the 20 meter band or handle via MARS. There is nothing wrong with this as long as the traffic gets delivered ASAP, but it makes one wonder

a bit about the NTS capabilities in this type of situation.

FLORIDA PHONE TRAFFIC NET

By Case, W4NGR

A month of glad tidings — A month with sorrow! We're happy in that our traffic handling stayed up. Gary, K4QYV hit the Jackpot one morning as NCS when he handled 20 pieces of traffic in a half hour's time. For out net this is something. Glad to have Frank, WB4KPK and Buddy, WB4OMG join our net! On the sorrowing side we lost Lou, W4VPQ of Fort Pierce and Lou, K4BAK of Palm Bay. K4BAK had just started to call back in after an extended illness when his key went silent. The death of these two fine radio amateurs will be sorely felt by many of us. Our sincerest sympathy to their families. Wynn, WA4COR is leaving our midst for school up in the mid-states. Very sincere and best to you Wynn. Raye, K4YPN is now in Inverness. Hope to see you at Melbourne Hamfest gathering, fellows. Remember it's 1940 Kilohertz at 7 am in the morning — Monday through Saturday, 73, Case W4NGR.

FLORIDA FAA NET

By George Cooper W4EM

August meeting of the FAA Net started out real good after a complete bust on July 26th. We hoped propagation conditions will improve.

Al Hendrick, WA4TMR Sarasota advises he had a very pleasant visit with an old friend Roy Purdy from the New York operations office.

By the time this goes to press W4JVA, Paul Colby, our fearless leader or better known as our Net Control should have his FTDK 400 And FLDX2000 linear in operation.

K4MY, Ralph came on with his new

ONE OF FLORIDA'S oldest amateurs is Harry W. Dreyer, K4HEN of Key West. Harry holds his OOTC (old old timers club) certificate which is dated 1906. Ve editor said Harry a visit last month and he says Bob Fenimore W4TV and the late Jim Kellow W4ZJ was from his class of 1906. Stick in there Harry OM! (SKIP Photo)

NAVY MARS

Bonnie Wieboldt NOPJQ
WB4FSF

July seems to be the month for new members. Welcome aboard to Nos. QWE (Orlando), QBR, QDQ, QDP. (Melbourne area), QDW (Tampa area) and PLF (Lakeland).

During Hurricane Becky, conscientious members were on watch faithfully throughout the emergency. Instant communication could be effected over the entire 6th Naval District at the click of a relay.

At this writing, Hurricane Celia has caused quite a commotion in Texas, and members are busy with traffic both into and out of the area.

In the South Florida area, section chiefs are appointed to assist the coordinator with his duties. They are Nos: SQB (NE area), UUL (SE area), OPU (SW area) and EXU (NW area).

Traffic throughout Florida has been high, as well as participation. It is great to be a member of an organization that does something rather than wait around for something to happen.

At the monthly meeting in Orlando, certain net operations were discussed. Chief Demuth baffled certain members with his "think" machine. How the thing works is still a mystery. There was a nice crowd aboard, and a good time was had by all.

AIR FORCE MARS

J. R. Hopkin Jr.
AFC4BND WB4BND

It is a good time to review our preparations and readiness in case of an emergency or disaster.

When was the last time you ran the auxiliary power unit? Is the extra gasoline supply fresh?

If not, pour it in the family auto and get a fresh batch, because gasoline does deteriorate standing for an extended period. The family bus has 6 or 8 cylinders to gobble it up while most power supplies have one to four at most. The point is, a fouled plug in the old bomb in the driveway will have less effect on the performance than is the smaller power plant. Next, is the antenna you are now using your emergency antenna? If so, what additional preparations must you make to

insure the reliability of its security in a high wind?

When you are confident that your preparations are adequate, see if you have a list of all the AF frequencies that will be used during the emergency that you are capable of monitoring and transmitting on. You might review the duties and responsibilities of a Net Control Station, because these emergencies don't care who the regular NCS is and leave him alone. Confidence in what you are doing is most of the battle in an instance like this and you might be called on to fill in until a regular NCS shows up. Even your Big Shot columnist makes mistakes each week and no one has shot me yet!

News from Area headquarters continues to be absent with no reason from there to expect any in the near future. We still

SKIP FIELD DAY COMPETITION

Following are submitted Field Day scores for the FLORIDA SKIP competition. Judging by the lack of submitted scores, many clubs perhaps feel that the competition is not worthwhile. At any rate herein are those scores that were submitted by our deadline date, Aug. 10.

Provided that the top scores are verified by the ARRL, you can readily determine which club or group will carry home the two trophies after awards presentations during the Miami Hamfest in January. Thanks and congratulations to those clubs who submitted scores.

QRPP — A NEW HOBBY

Although QRP has been an area of Ham Activity for many years . . . (too many of us remember when it was not an area by choice, but of monetary necessity) . . . QRPP is a new variation. For those to whom it is a new Q signal, it stands for "under 5 watts, power input".

Today a growing number of hams are finding new thrills in designing, building, and operating the new breed of QRPP transmitters. The yardstick — miles per watt! It appears that L. G. Windom (8GZ) set the record back in 1925-26, with a score of 17,820 miles per watt. Yep, you read it right, SEVENTEEN THOUSAND, EIGHT HUNDRED TWENTY MILES PER WATT! He used 3/10 THS of a watt input to a type 199 tube operating in a variation of a Hartley Circuit, feeding a carefully cut single wire antenna and worked all US Districts, Brazil, Australia, and New Zealand. The record apparently still stands, although today's QRPP operators are pushing it. (Windom worked on 40 meters!)

At least one commercial manufacturer (Ten-Tec) offers a QRP Transceiver, while the home brew gang has a ball with their many circuit variations with emphasis on the solid state devices. There are two bulletins that carry QRPP articles: THE MILLIWATT, care of Adrian Weiss K3 EEH O, Univ. of South Dakota, Meckling, S. D. 57044 and RANDOM RADIATION, the official publication of the Pacific Coast Radio Guild, care of Howard S. Pyle (W7OE), Gen. Mgr., Box 784, Mercer Island, Wash. 98044.

A whole new world of activity and interest is opened in QRPP with WAS QRPP a matter of real interest to many . . . who will be the first!

de W4NED

IMRA NEEDS HELP

The IMRA needs help monitoring the first 25 minutes of the following hours. Can you help??? 1600 — 1700 — 2100 — 2200 — 2300 — 0000 — 0200 — 0300 GMT. If you can help of it you could like more information about the IMRA and its Monitor System, write to:

Sister Mary Emmanuel
— WASVBM
1501 Lotus Lane
Lufkin, Texas 75901

The IMRA is the INTERNATIONAL MISSION RADIO ASSOCIATION. It is a group of amateur radio operators and associates dedicated to providing communications for Missionaries, Peace Corps workers, and anyone needing communication with the Mission field. It is a non-denominational organization with a membership of more than 200 men and women from all walks of life. Anyone who can help is welcome to join the group.

There are two IMRA NETS (Roll Calls) daily, Monday through Friday, from 1900 to 2000 GMT and from 0100 to 0200 GMT, on 14280 KHz, plus or minus QRM. These Nets serve as traffic exchanges for the Mission field and as a meeting

TRUE TOWER TALE

By Rick Rutan, K4BNE

Seems like I was born looking for a tower in my price range. Too expensive. Too far away. No cash on hand when a real bargain appeared.

Ten years I waited. And waited. And waited.

Two months ago a good buddy called. "Hey, Rick I've got a 40-footer you can have if you'll come get it. Old, but in fine shape. Crank-down, tilt over, with a long mast on top."

Being partially disabled (more lazy than hurt), and working weird hours, it took me two weeks to gather up four strong pals and a 20-foot boat trailer. But we hauled that monster clear across town and

place for members and monitors needing assistance in reaching the Missions. All interested in the Missions are welcome to participate in these Nets.

The IMRA monitors the frequency of 14280 (plus 5 and minus 5) KHz, the first 15 minutes of each hour Monday through Friday, from 1900 GMT to 0315 GMT. A monitor station can be contacted by calling CQ IMRA, on or near 14280 KHz.

onto the island where I live. Put it on the ground in empty lot next door.

Another month passed. Finally dug a hole to pour concrete base. Ran into a water pipe. Moved the hole three feet north and dug again. Free-standing tower construction in pure sand. Need a cubic yard of ready-mix. Nice dry digging weather, though. No rain for two months.

Finished the hole, forms and plastic lining Saturday. Rained like hell Sunday. Hole filled up with muddy sand. Concrete delivery due 1300 Monday. Dug it again Monday A.M.

Concrete truck (big one) rolled up right on schedule. Driver looked at excavation, commented how easy it would be to back up the driveway and chute the concrete down the hole.

Went inside to get a check out of the checkbook. Went back out to watch the pour job and set the bolts in place. Sorry I went out.

Concrete truck sure makes a mess when it backs over an antenna tower, doesn't it?

LICENSE COURSE RESUMES

The popular commercial phone and amateur extra class license course conducted by Al Wilcox, W4ELR, resumes Sept. 9, 1970, at Southwest Miami High School.

This evening adult class offers concentrated, fast moving review of all the things you will need for the FCC exams. 180 hours of instruction and practice tests for a registration and materials fee of \$5.00 is a bargain in any man's language. The textbook is extra. Tell your friends about it.

The Palmetto Expressway gives easy access from anywhere in Dade County.

FOR SALE: G50 Gonset Transceiver for 4 meters with mike, perfect condition. 8L Hy-Gain Beam \$140.00 for all. Tom Jones, W4HDD, 260 Hampden Rd., Winter Haven, FL 32980.

WANTED: Two tube sockets for Eimac 304TL, E.F. Johnson type 114-213-1 or equivalent. Roy L. Simonds, W4RLR, 427 Lucile Way, Orlando, FL 32811.

FOR SALE: 2 meter FM crystals for use in Motorola. 1 each receiver and transmitter 145.51 mhz. 3 each 147.35 mhz. 5 meter AM crystals (1) \$350 for 50.1, (2) \$400 for 50.4, (3) \$417 for 50.5, (4) \$456 for 50.7, (5) \$500 for 50.9, (6) \$550 for 53.7 mhz. 75c each. James Aspey, W4ZHG, 12 Nahkoda Dr., Miami Springs, FL., 33166. Ph. 305-887-7719.

FOR SALE: High power VHF Transmitters. Electra Voice type TUL looks like capable of one or two kilowatts input. Just right for moon bounce or FM work. Has modulation transformer for A.R. 220 V.A.C. single phase power required. Unit weighs more than one ton, \$1500.00. Lots of other VHF gear AM and FM. Ivan Smith, W4PLO, 1314 Crestview Ave., Holly Hill, FL, 32017. Ph. 252-2340. Also want Ameco CN-50 converter.

FOR SALE: Hy-Gain 14AVQ vertical 10 through 40 meters with ground plane and house mounting bracket, \$15.00 or trade want: Drake TR3 and AC supply in trade for custom hi-fi stereo system which cost \$750.00. W. Guy Watson, K4APE, 2550 N.E. 32nd Terrace, N. Miami Beach, FL. Ph. 962-6467.

FOR SALE: Heathkit Marauder transmitter HX-10 \$160.00. Also matching Mobark receiver \$125.00. H. Alan Harp, W4ASVB, 718 Magnolia Dr., Lake Park, FL 32403. Ph. 305-848-9017.

FOR SALE: Harvey Wells T-90 transmitter with power pack, \$50.00. National 190 receiver \$135.00. RTTY "TU" \$30.00. Bill Ross, K4RDG, 765 Bonnie Dr., Lakeland, FL., 33603.

WANTED: 1 KW Low Pass Filter. Urgently needed. Johnson or similar. Write details. Mike Graham, WB4UDJ, 212 Stadium Trailer Pk., Key West, FL., 33040. Ph. 236-3639.

FOR SALE: Globe Scout deluxe transceiver 90 cw 75 AM with matching VFO which covers 160 through 6 meters. Transmitter covers 80 through 6 meters, VFO in perfect condition. Both for \$30.00. Local only. James Gillespie, K4IYN, 1297 - 54th St., N., St. Petersburg, FL 33710. Ph. 345-6646.

FOR SALE: Mini-Vertical Antenna 6, 10, 15, 20 meter bands. Replaced it with Quad. Cost \$25.00, asking half. Includes mast and clamps. Gene Stultz, W4MHE, 19006 N.W. 11th Ct., Miami, FL. Ph. 627-1322.

ARNS—WHAT IS IT?

The Amateur Radio News Service has the prime purpose of aiding and assisting amateur radio newspaper editors in any manner possible to improve the publication of the amateur Journal of newsletter. Additionally The Amateur Radio News Service provides a common central point for cooperation of public relations individuals concerned with amateur radio. In other words, ARNS is dedicated to a better understanding of amateur radio through more effective public relations and club publications.

Dues are only \$3.00 a year. Write Al Marcy, W4ID, Secretary, 461 - 3rd Ave., Seapark, Eau Gallie, Fla. 32937 for more details and applications.

MINIATURE 2 METER 10 WATT FINAL

Jay Bronson, W4VTJ

The Orlando Hamfest afforded me the opportunity to view two amazing new lines of VHF equipment, available at prices in line with what the ham can afford.

The lines being referred to are Dynamic Communications, Inc. and Spectrum International, and of the two, a most amazing bargain was that of Dynamic Communications, Inc. Their new 101-500 is the hottest item appearing in quite some time.

This solid state "printed circuit" final puts out a clean 10 watts on 2 meters. Only 10-20 mw of drive is required for full output.

The unit operates on 12 volts and outputs when the drive is applied, making it an ideal booster for 2 meter FM walkie talkies. The unit is broadband, requires no tuning for operation anywhere in the 2 meter band and comes pre-tuned. The unit measures 2"x2"x6", including the heat sink enclosure. The unit will operate on 6 volts and put out 5 watts.

QUORUM PRESENT

How many times has there been difficulty in transacting club business because of lack of a quorum. The Gulfstream Society of Amateur Radio Operators of Lake Worth seemed to have solved the problem and, at the same time, recognize others who are in the Ham World.

President Richard Kidder, WBIAKH, through the Board of Trustees, has issued HONORARY ASSOCIATE letters to several members who have left the area because of job assignment but desire to maintain identity with the Society. This status is not a membership, though the Honorary Associate may visit anytime he is around, he does not pay dues and cannot vote. If he should return to the area it will be possible for him to automatically return to full membership by resuming dues payment at that time. The other section of this arrangement makes it possible to honor Hams who, for very good reasons, can not maintain an active membership. This particular section was proposed to respect those Hams who have a physical disability, and who could not possibly be active in any other way.

Now we have our quorum present. 73 WBIAID

WE THOUGHT YOU might like to see the 4 Florida QSO Party trophies awarded to L to R: W4LJHQ, W4IPXW, W4INC and K4GRD. The one for W4LJHQ was mailed last month. The other three will officially be awarded at the Miami Hambooree in January next year. (SKIP Photo.)

FLORIDORAS MEET AGAIN

The Orlando Hamfest is the highlight of the year for the Floridoras, as it is where they organized in 1957, so have their annual meeting there.

Saturday, May 23rd, 24 enjoyed a Floridora luncheon at the Hilton Inn Dining Room. There was a Floridora Booth set up in the Dresden Room, where the girls could meet, sign the guest log, look at the scrap book and album and just gab-fest. For those who arrived late for the luncheon, it was a place to hear about it and find out how many were around. Saturday night, many were seen at the dancing "cutting the rug" with their OMs.

Sunday, the annual meeting was held at 9 AM, with coffee and cookies available. Many items of business were discussed and decisions made. K4UIZ, Ev presented each girl with a beaded bracelet, to which a key ring was attached, with choice of color each preferred. As usual, this lovely surprise was made by Ev (in her spare time???) and we marvel at her clever ideas and time and effort to make our meetings so unforgettable. Thank you, Ev! She also distributed 5 1/2 x 3 1/2 note pads, with the Floridora Girl emblem and Net info printed in the upper right hand corner. These were compliments of Florida Skip who will supply them to individuals at a very

low cost. The door prize, a handy barometer, was won by K4LFA, Dorothy, who was delighted, as said it would come in very handy, as she does considerable flying.

The election of officers resulted in: President, W4KOH, Ernie McMasters; Vice Pres., W4QBY, Dorothea Seaver; Secretary, K4RHL, Ellie Hornor; Treasurer, K4WXS, Lee Kanarian. Appointed were: K4HSC, Meg Heanon, Net Manager; K4UIZ, Ev Shea, Historian; W4CWV, Annette Thompson, Membership Chairman; K4RNS, Marge Campbell, Certificate Custodian and W4BAV, Cathy Soehl, Publicity Chairman. W4BIL, Fran Foley (1st President of Floridoras) installed the new officers and made the presentation of the usual gavel pin (to be attached to the Floridora pin) to W4CWV, Annette, outgoing President. W4KOH, Ernie expresses her appreciation for the honor of being elected President after 10 years of absence from the State, due to her husband's business transfers. Ernie is a charter member of Floridoras. She appointed her Committee Chairmen and asks cooperation on any of their calls for assistance. So begins another year for the Floridora YLs.

HAM CAMPOREE REPORT

The BARS Ham Camporee at Florida Camplands, June 12-14, was a great success. Twenty-two camping units made the scene, and several groups came for the Saturday evening picnic. In all, over 100 people were present.

Swimming, yakking, hamming, singing, and story telling, antenna demonstrations, and transmitter hunting were enjoyed by the hams and their families.

At the Saturday evening campfire, Case W4NGR led the singing of some ham songs prepared by W44YNX Alma. Later, a Sideband Manual was awarded to W4SQE and W4OBT, A. C. and Lillian Poicete, of Nashville, Tenn., for coming the farthest. Mike and Peggy Hagans W44AGI & W44E2S won the free week end at Florida Camplands, Don Wilson W4NDG was an operating mammal, & Earl Rhoden W4NDV and Walt Terrie W44FBI won logs in the drawings.

The hidden transmitter hunt was called off near midnight by the sheriff's department. It seems that many of the "natives" were alarmed by the number of cars driving back roads near their homes. By mutual agreement, the Xmt hunt winter was chosen by a drawing of those participating. W4YSO Nat Atwood won a 1970 Radio Amateur's Handbook.

AIR FORCE MARS

(Continued from Page 11)

have no permanent frequency. With the propagation the way it is on the present borrowed frequency, it will be a relief to get our own so we can operate later in the evening when it is better. The relaying of traffic within the region should be unusual rather than necessary almost half the time. With the continued deterioration of the frequency due to the wane of the last sunspot cycle we can expect no improvement for several years. Several frequencies have been monitored intensively and by several stations in different locations and recommendations made. We all hope these recommendations are carefully appraised and acted upon soon.
